Subject: Winter-Run Life Cycle Model Results

Hi all --

We received WRLCM results earlier this week. They are saved on the drive here:

S:\LCM_Files

There is a presentation with results in graph form, the data to support those, and also figures of the physical drivers (generally flow, storage, etc.).

I'll set up a chat time with me, Evan, Jeff, and Eric Danner early next week. **Please let me know if you think you should be involved, too.** This would be to discuss interpretation of results, so if you are on the invite (forthcoming), prep for that.

Then we'll talk with Noble once he is back April 15. But we can do what we can in the meantime.

I'll be working on the effects section on LCMs, which will include results from this and IOS, a la CWF.

Thanks,
Cathy
