Subject: RESPONSE REQUIRED - ROC LTO I&S Tables

Hi all --

Below is my assessment of the ROC LTO I&S tables for each division based on what I have found on the server (or been told in person). ***Please email me before Monday 10:30 am to offer corrections or, if I'm correct, provide confirmation.***

American - Done for species (but unclear if applies to all salmonids in river, or only as specified). Not done for CH.

Clear - Done for species. Done for CH.

Delta - Done for species. Done for CH.

East Side - Done for Steelhead (is in document body in Effects Section directory); other species outstanding. CH outstanding.

Shasta (in Effects Section directory) - Done for species. Done for salmonid CH; GS CH done soon.

Assignment - These need to be completed first thing. Prioritize in this order:

WR
GS
STH
SR
CH

Please contact me or Garwin now if you have concerns or a challenge in getting these done, or a competing priority. Brian and Joe are beyond "needing" WR and GS, respectively, since they are closer to done than starting those species. They will be on to SR Tuesday or so (Brian) and STH on Monday (Joe).

Thanks,
Cathy
