Subject: Delta Division effects section
Attachments: 2.5 and 2.6 Delta V5.docx

Jeff and Barb,

Attached is the latest version of the Delta section. Please make sure to place a copy in the ROCON drive. My VPN is acting up and I can't seem to connect to the server.

This is a cleaned up version, so most comments that have been incorporated were deleted, and edits accepted. There are a bunch of edits in various places to tighten up the language from the RPA or PA. we should use verbatim text when possible.

There are a few more outstanding comments that need to be addressed, or have a response, for example, my last comment regarding the CH section.

If you incorporate more comments this weekend, please update the file name, and also send to me. On Monday, I will save a clean copy and send onward for internal review.

Thanks.

-Garwin-

Latest version is attached and on the ROCon drive. Maria did have one additional section she wanted to address regarding hydrodynamic effects in the south Delta which will have to be a place holder for now until I can write it up. Maybe I can work with Barb to include some of the SST report findings s to fill this section..

Have call with Russ Perry and Cathy this morning to discuss getting his transit model run and incorporating Delta survival / transit times into the Delta section

Please e-mail me your revised effects sections (obviously with my assumption that you're done, and place a copy in the ROCON drive).

Thanks.
