Subject: Re: salvage density data for steelhead

I think the salvage density stuff is all by Steve Zeug, no? Lenny and Jason are about the loss model and I don't think we have results from that? We can talk Monday.

I don't know off top of my head, would have to look into it a bit. I can but not for a few hours. Maybe look into the past emails from Lenny or Jason?

Do either of you know if the salvage density modeling for steelhead is based on wild steelhead salvage? Or hatchery + wild? Significant for our "pop level" context and the blurb from CWF just seems to describe modeling for winter-run...

Is there somewhere in the ROC BA or CWF BA or BiOp that provides documentatoin on how these modeled salvage numbers are generated, with (for WR) or without (for all others) normalization?
