Forgot to cc you in my re-send with the Appendix bibs.

I just dropped your section in near the top, after my "block" addition -- you have some similar language later but my stuff also creates some redundancies which I'll try to clean up later if we have time.

Do you mind if I delete the fall-run and late-fall-run DPM numbers? Including those runs seems inconsistent with the rest of the section...but I left them in for now because maybe that was the plan (and Garwin didn't comment on deleting them).

Maria -- Attached is an updated version of the Delta section with additions based on your feedback on Wednesday morning. **Also attached is a proposed Appendix to the opinion with annotated bibliographies of recent Delta-related science.** It is still rough; I'll give you a call and we can walk through some of the key additions and prioritize any remaining to-do's.

Some remaining shortfalls include:

- summary of Chinook and steelhead 6-year study results
- inclusion throughout text of specific recent citations; still relying on reference to SST report and annotated bibliographies in Appendix to incorporate by reference recent lit reviews.
