**Subject:** Fwd: Potential options for incorporating beneficial actions into the summary tables: - Invitation to edit

Hey team,

I think we settled on a good approach to incorporating beneficial actions into the I&S tables (option 1 in the attached google doc). Most of you have been loosely following this approach and we'll be sending you I&S sections to review tables for accuracy in the next day or two. I also have made some changes to some 'uncertain' magnitude stressors based on assumed effects that you will need to review and potentially cross-reference with your effects section.

Thanks in advance

Joe
