Subject: Re: Delta section coordination for Tuesday COB

Thanks, Barb. See red, below.

Also, look for an e-mail from me following up on Cathy's e-mail.

Garwin and Cathy -- Please weigh in if my plan of attack doesn't sync up with what you expected to hear.

Jeff -- Per yesterday's meetings and post-meeting debrief, it was decided that responses to the DOI comments for all effects sections are due Tuesday COB (*don't panic yet --- go to plan of attack at end!*), when the updated drafts will be passed along to the I&S leads. Some targeted elements will be shared with Reclamation Tuesday COB and a full "peer review package" will be shared with Reclamation on Friday (after another internal review).

I have been assigned to address comments on the Delta, including the three targeted elements due to Reclamation on Tuesday. The three targeted elements are (1) putting salvage-density model results in a population context, (2) More explanation of our conceptual model of far-field effects, and (3) inclusion of the DCC clarifications from the meeting this week.

Plan of attack (*call me if you have questions/qualms/revisions*):

Barb

- By 8am Monday: Get targeted Delta elements to the management team (and you) to allow time for review/revisions before sharing with Reclamation Tuesday COB.
- By 8am Tuesday: Address as many DOI comments as I can (focusing on those related to PA clarifications) and send to you for a final check. **PA clarifications are highest priority to revise, then the trickle down of any potential changes associated with those PA changes. If there were non-PA clarification comments that Reclamation highlighted during the Delta meeting, work on those next. Finally, don't beat yourself over the head with trying to address as many DOI comments as you can, but scroll through the doc to try to identify those that may be more relevant to address than others.**
- By COB Tuesday: Complete any revisions to targeted elements, and make sure they get into the master Delta effects document. Work with you on any questions you had on my revisions. **This deadline is for entire effects sections, not just addressing DOI comments.**

Jeff

- On Tuesday, by COB: Review Barb's edits (Delta elements received Monday morning; full Delta section received Tuesday morning), drop in any Perry stuff ready to go. *If you'd rather get some "rolling" edits over the holiday weekend to limit the amount of review needed on Tuesday, let me know.* **Make sure to coordinate often with Barb and the management team. If you have time (e.g., you're done with your tasks and are awaiting Perry's draft report, expected by COB Tuesday), coordinate with Barb on comments you can tackle.**

Jeff & Barb

- Tuesday COB: Check in at end of day Tuesday to deal with any revision questions and make sure all our "parts" have been incorporated into the MASTER doc. Post final to ROCON and let ROC managers know we're done. **This is the actual deadline, so the individual tasks above may need to be adjusted to be completed a little earlier so the coordination, syncing up, addressing comments, etc., can occur with a completed section by COB.**
