Subject: Re: Delta section coordination for Tuesday COB

11 a.m. it is for the targeted elements. We committed to sending all of them over to Reclamation by 5 p.m., so please stick to 11 a.m.

The end of Cathy's ROCin' Into Next Week said " However, the workload targets identified above don't have *any* wiggle." So true. Slip on one will cause more and greater slips. I don't know what time ~6-ish is (except I suspect it's later than 6 p.m.), but the timeline says 5 p.m. to complete all effects sections. Please stick to that.

Kristin and Jeff are available to help, so please use them for the East Side and Delta Divisions, respectively.

New ETA for targeted elements ~11am.

If I could use this evening to work more on the Delta (or work on the Stan, so I can spend all today on the Delta), that would be great. But I'll assume it's pens down ~6-ish unless I get the okay to extend COB until tomorrow morning. Jeff, I'll cc you on the targeted elements but am running behind; I may need to have you double check my edits later this week and I can accommodate any needed revisions along with other reviewer comments at the end of the week.

FYI, I wasn't as productive as I planned yesterday and won't be done with the targeted Delta elements until late today.

Garwin and Cathy -- Please weigh in if my plan of attack doesn't sync up with what you expected to hear.

Jeff -- Per yesterday's meetings and post-meeting debrief, it was decided that responses to the DOI comments for all effects sections are due Tuesday COB (*don't panic yet --- go to plan of attack at end!*), when the updated drafts will be passed along to the I&S leads. Some targeted elements will be shared with Reclamation Tuesday COB and a full "peer review package" will be shared with Reclamation on Friday (after another internal review).

I have been assigned to address comments on the Delta, including the three targeted elements due to Reclamation on Tuesday. The three targeted elements are (1) putting salvage-density model results in a population context, (2) More explanation of our conceptual model of far-field effects, and (3) inclusion of the DCC clarifications from the meeting this week.

Plan of attack (call me if you have questions/qualms/revisions):

Barb

- By 8am Monday: Get targeted Delta elements to the management team (and you) to allow time for review/revisions before sharing with Reclamation Tuesday COB.
- By 8am Tuesday: Address as many DOI comments as I can (focusing on those related to PA clarifications) and send to you for a final check.
- By COB Tuesday: Complete any revisions to targeted elements, and make sure they get into the master Delta effects document. Work with you on any questions you had on my revisions.

Jeff

- On Tuesday, by COB: Review Barb's edits (Delta elements received Monday morning; full Delta section received Tuesday morning), drop in any Perry stuff ready to go. *If you'd rather get some "rolling" edits over the holiday weekend to limit the amount of review needed on Tuesday, let me know.*

Jeff & Barb

- Tuesday COB: Check in at end of day Tuesday to deal with any revision questions and make sure all our "parts" have been incorporated into the MASTER doc. Post final to ROCON and let ROC managers know we're done.

Barb
