Subject: Re: Delta stuff

Also good news, Russ and I had pretty much the same interpretations of his modeling so I don't see that the new section will need any alterations - Russ had more details, particularly in how the model is constructed and run, but I don't think we need that level of detail for this. Besides, his draft has not been reviewed yet so that makes citing it a little thorny. We'll discuss that up the chain.

I'm up and have the Delta section open. Going to start with Rosalie's comments (will transfer over and address in master doc on server; NOrma was in there adding Endnote citations so we can't use Maria's or Rosalie's docs as a new base document...), then will shift to Maria's.

I also want to address table/figure numbering, if possible, but figure that is the lowest priority before sending to Garwin at 4pm (not absolutely necessary for Rec's review). I can finish that on Friday.

e-mail, call or text me if you want me out of hte doc.
