Subject: Delta section updates -- 9:40am update

As of 9:40 am, I have:

1. Accepted most changes and deleted most comments (that were present in V12) to start with a relatively clean base document.
2. Transferred over all of Maria's edits and comments (in track changes). I noticed that some "old" comments (NMFS as author) showed as from yesterday; when in doubt, I transferred over as a new comment.
3. Addressed all of Maria's comments that need to be addressed before peer review (but **Jeff** should check my edits and revise as needed). No comments on HORB or Shasta water transfer sections; confirmed with Maria that she was okay with those sections and had no comments there. *The two pending comments (need to be addressed, but not before peer review) are on p. 16 and p. 18.*
4. Dropped in effects tables in designated section (after figures and tables sections). **Formatting and updates to all cross-refs still needed.**
5. Dropped in effects tables in Critical Habitat section. **Formatting and updates to all cross-refs still needed.**

Closing out and handing off to Jeff to transfer over his incorporation of Rosalie's comments. **Jeff**, call me when you finish transferring Rosalie-related edits and I'll work on the table numbering.

Barb
