Subject: sneak preview of NMFS response to Delta edits

Almost done -- here is the sneak preview for your meeting. When I send the doc, I think you could go through at the meeting together if you wanted; all my comments are drafted in the expectation that would be shared with Reclamation.

Addressed most edits -- even if I didn't accept DOI wording; I tried to capture the spirit of the suggested edit in my own words. **However, the key flags for DOI are that NMFS did not accept the proposed deletion of the Perry Survival Modeling and Buchanan results.** NMFS *did* accept the proposed caveat in the introduction to the Perry Survival Modeling (to acknowledge that the real-time triggers might offer better protection than shown in the modeling), and added some context to the section discussing the Buchanan model. **Another flag is that while NMFS accepted deletions related to COS/RPA in the "Deconstruction of the Action" sections, NMFS retained, for comparative purposes, some discussion of the COS when evaluating effects of the PA.** I did remove "RPA" from any flagged sections.
