Subject: FYI: Follow-up from McCarthy et al staff meeting yesterday

Good morning Chris,

FYI on the attached getbacks for Rep. McCarthy's office following your meeting last week. Staff had asked for a copy of the draft timeline for completing the BiOp (which we had shared with stakeholders) and a brief description of a meeting with water stakeholders. Let me know if you have any questions.

Thanks,
Sam

Hi Sam and Brianne! We had a productive conversation with the McCarthy et al staff yesterday. They wanted to understand where we are on the CVP biop and had been hearing concerns that we would either slip in the timeline or find jeopardy. Barry and Chris discussed where we are and dispelled some mis-perceptions about our engagement with BOR.

We walked away with 3 getbacks. I've cced Barry so he can chime in if he has slightly different recollection. Let me know what the ETA will be for #1 and #2. I can see McCarthy's staff asking very soon for the timeline (aka like today or tomorrow). Thanks, Alexis

Getbacks --

- 1.) Please provide draft timeline for completing the BIOP (the one provided to stakeholders)
- 2.) Please provide a debrief on yesterday's science related meeting with the water stakeholders
- 3.) Please give the Hill a heads-up on ANY timeline slips
