Subject: Re: Idea for giving guidance to Rec re: programmatic vs. site specific

Seems to me that the ball is in our court now to determine whether any given action is site-specific or programmatic (or not at all). We have way too many meetings than time, and can't afford to wait for Reclamation. Telling them is all we could do without spending a bunch of time showing them, and sacrificing time we desperately need.

I think we have some examples of mixed programmatics that they provided during CWF too. Is that an option?

What if we ask Naseem and Rosalie to pull from their own experience and identify examples of:

Programmatic consultations: Example of shortest/least-well described completed in the region and example of a very high-quality consultation.

Site-specific consultations: Example of shortest/least-well described completed in the region and example of a very high-quality consultation.

We could share those with Reclamation to SHOW, rather than TELL, them the bar they need to meet, and it also provides a way for us to describe for our record how we are (or are not) accepting things at the level Reclamation may have identified, CONSISTENT with our past practice.
