Subject: Delta Effect Section V3

Hi All -

I've compiled all of the various sections drafted by everyone who is contributing to the Delta section into one document - All of your previous drafts and files are contained in the Archive folder at this time.

2.5 and 2.6 Delta V3 - is the compiled and working version at this point.

If you have authored anything that should be included under the Effects to the Delta section - species or critical habitat, please ensure that I have properly inserted your work. Once you have reviewed V3, please add your initials to the filename.

One comment I have made throughout is regarding CH. On the first draft most of you included analysis of effects to critical habitat in section 2.5.6. We may consider pulling all of those out and putting them under Jeff's newly drafted 2.6.6 section.

Thank you!
Susan
