**Subject:** Re: Loss numbers for SR and steelhead -- data and slides  
**Attachments:** ROConLTO\_loss slides v2.pptx

In the attached version of the loss slides, I flipped the PA and COS columns, fixed what I'm guessing were a few rounding issues with the PA-COS subtraction, and changed "salvage" to "loss" in the slide one column heading.

In the main briefing presentation for Barry, on the s-r I&S slide, I changed the salvage table to the loss table, but didn't mess with steelhead because of lack of space. R:\Briefing Material\Internal\_NOAA\_NMFS\Barry Briefings

Yes, thanks Barb and Jeff!

fyi, I may flip the PA and COS columns in the slides to match the left to right order of the PA-COS column.

Thanks, Barb and Jeff, for the quick turnaround! Definitely more telling/compelling.

Subject docs attached. Jeff and I collaborated on these. We drafted some slides; use as they are or snag the parts you need. (Note that there are no changes to the steelhead I&S slide and no room for the loss table; so added a new slide with just the loss table).
