Subject: ROC on LTO: American River Division

I know were still waiting on more comments, but... I have finished addressing Rosalie's comments in the American River Effects Section. A couple of things I couldn't find information on:

1. Rosalie's question on whether the NMFS 2009 BiOp RPA Action II.3 (requiring physical and structural modifications on Folsom Dam) has been carried out at all?
2. Updated values for annual water deliveries from American River Division. I updated this section with CalSim II model results instead (per Evan's suggestion), but I'm not sure if that is enough.

All references not yet in EndNote have been sent to Norma for addition and can be properly cited once they are on there.

Joe & Brian-- You should make sure I incorporated the two new figures from Stephen as you intended.

Brittany
