Subject: Re: Archive I&S Sections
Attachments: approach to restoration-monitoring in EnvB vs. Effects vs. landS.docx

Thanks Brian (and for Joe too),

sounds good.

Brittany and I looked through an older version to track what happened with uncertainties, and it looks like conclusions are improving - I sent an email to managers about a slight further adjustment. Basically we consider them at the "frame-work level" in the Opinion.

I&S would have a section either up front or in each species to describe inclusion of those pieces for the J-analysis.

Have you two seen/incorporated the "approach" document language (attached) in the I&S?

I'll be in D.C. Mon/Tues, but likely available via email here and there if any questions/thoughts.

fyi, the latest version of the spring-run I&S is now this:

2.8 Integration and Synthesis ELLROTT SR V2

I put the previous version in the Archive folder. I made a new version because I wanted to preserve the old one before making changes to address comments that Rosalie made on the w-r I&S that also would apply to the spring-run I&S.

Hi Susan,

There was only one version of the I&S for w-r and one for s-r in the main folder - I've been archiving along the way.
