Subject: My notes on specific follow up items from Friday

All,
Here is my check list from Friday. It doesn't have any of the broader context or what we agreed to and/or left open (Howard is drafting a piece now). It would be good to go over these with Reclamation at technical meeting tomorrow and make we have who and when assigned to these.

NMFS to do:

1. Draft and share proposed mortality/survival performance objectives
2. Look at FWS specific baseline language for inclusion in our Biop
3. Double check current projected costs from DWR on Georgiana barrier and FDW/DWR positions on this and HORB
4. Work with Reclamation on salvage-based performance objectives, based on salvage since 2009 opinion in effect

Reclamation to do:

1. Send COA analysis of storage gains
2. Drought/dry year plan or process language (now or to be submitted in future)
3. DCC matrix/plan or process (now or to be submitted in future)
4. Develop and share Shasta language that tiers will not be changed midseason and all discretionary actions will be taken to stay within a tier

I am interested in connecting with management and staff leads on 1 and 4 on our list sometime tomorrow.

- M
