Subject: Re: response requested

Joe -

I can't fathom any types of changes of that sort based on the past week, especially since we don't have commitments on changes or actions. So nothing from Shasta.

I do hope today to revise the tables to change to "frameowrk level" text when needed. I'll just poke those in when I find them free.

Cathy

Hi Team,

Brian and I are trying to finalize these for peer review clearance today and have a quick question for division leads-

Will any of your recent effects section edits require **significant changes** to the results of the I&S stressor tables?

Significant changes- downgrading high magnitude stressors to low/moderate or upgrading low/moderate magnitude stressors to high

Here are the most recent versions of the I&S sections if you want to quickly review of the tables-

2.8 Integration and Synthesis winter-run V5

2.8 Integration and Synthesis spring-run V5

2.8 Integration and Synthesis SH V4 srb

2.8 Integration and Synthesis GS V6 srb

Please let us know as soon as possible

Thanks

Joe
