Looks like access has expired, and we were furloughed for the duration that the files were available for download.

Did anyone download and save these somewhere? To have for our record?

And, for the record, I'd save this original email for the record ;). Even though we didn't read it until today.

You received **2 files** from [kharrison@usbr.gov](mailto:kharrison@usbr.gov) via BOR-kiteworks

Hello all -

Attached is the draft ROC on LTO Biological Assessment and appendices. We appreciate all of your work on the Tiger Team to help us develop this document. Please provide your comments by the end of the day on Friday, January 11 so that we have time to incorporate for our January 31 deadline.

Please note that this is a draft document. We are continuing to work through the effects of the voluntary agreements as provided on December 12. We will continue to strengthen our analysis and add more details as we approach our January 31 deadline. The Delta Smelt effects analysis and effects determination is our template that we are striving to match in terms of the level of detail and analysis for all of the species. In terms of directing your review, the Delta Smelt effects analysis, most of the effects analysis for the Core Water Operations actions for the Delta and Sacramento Rivers, and the appendices are substantially complete. Some of the effects analyses for entire species, most of the non-flow actions effects, and most of the effects determinations are still under development.

Thank you,

Katrina Harrison
