Subject: Re: Status of the Species for ROC on LTO

Hi Kristin

I see that Southern Resident Killer Whales are not currently in the Status of the Species section. This is good, since I have a full update for them that is ready to go. I also have (in the same document) a draft of the Environmental Baseline relative to Southern Residents, although that may need some tweaks depending on how the rest of the Opinion is ultimately constructed. I'm not really sure what the marching orders are for these sections - how shall I proceed? Should I send the Status to you? The Baseline as well? And what about references?

Dan

Hello All,

Please see the draft Status of the Species document on the google drive. I have just sent you all the link. There are still track changes in this version, so we will be replacing this version with the final once it is reviewed.

Thanks,
Kristin
