Subject: Re: Urgent: Information Requests for Effects

Thanks folks for pulling this together. I just sent it off to Katrina, so hopefully she can help us out before she leaves! It's almost Saturday, and I hope you all are going to take some much needed time to yourself!

Howard -- got in my requests to the doc, including two that may be of general interest):
--higher res Division maps from the BA intro
-- map for each Division showing all locations for which flow or temperature modeling results are presented in Appendix C.

This last was inspired by a specific request from Brian for that sort of map for the American River, but makes sense to have for all Divisions. Some of the maps in the BA intro already have some of the modeled locations, but not all....

Note that if you want a higher res version of the "life history timing tables" (e.g. Table 5.8-1 of the BA), those tables in the BA that cite to NMFS 2017 come from the CWF BiOP; we can grab high-res versions from the CWF BiOp file on our server in: R:\Helpful reference documents\CWF BiOp

Effects Drafting Team,

Subject: Change in timing for our Request for Maps and Figures

On Monday we discussed the need to request updated figures from Reclamation for items such as maps for American River temperature compliance points and figures without the Without Operations Action scenario depicted. We learned that tomorrow will be Katrina Harrison's last day in the office for awhile and she is the person, in all likelihood, who will develop the maps and figures for us.

So, instead of getting this request into me by COB today, I am requesting folks to get these to me first thing in the morning today. I will be sending the request to Katrina at 11 this morning.

I created a word doc at the location below for folks to populate with their requests, so please use this instead of sending me individual emails.

U:\Data_Tech_Info\Information Requests

Thanks team!

Howard
