Subject: Re: Stan effects update
Attachments: Fry Emergence.docx; 2.5 and 2.6 East Side Effects V2_DO Requirement.docx

Hi Barb,

I checked out the Caswell reports and searched Kennedy and Canon for fry emergence timing. You were right, fry typically emerge in January, as early as December, and sometimes as late as March. I updated the text in the DO requirements section. If you don't mind, please add my "V2" version to the server. I also attached some copied and pasted text from Caswell, and Kennedy and Canon.

Thanks,
Kristin

Kristin's section is done (she sent to me yesterday) and saved in:R:\Draft BiOp\2_ESA\2.5-2.6 Effects of the Action\East Side Division (also attached since Kristin can't access server). I've taken a quick look and made a few edits in track changes.

I'm still working on mine and it's not ready for review. Current version (2.5 and 2.6 East Side Effects V1_Seasonal Operations_4.1.19.doc) is saved in:R:\Draft BiOp\2_ESA\2.5-2.6 Effects of the Action\East Side Division
