Subject: Re: SOS

Will do.

She had the same comment for distribution tables in the east side effects section. I've updated the spring-run steelhead table, and Page updated winter-run and green sturgeon. I'll put on my to do list to get the updated tables get into the environmental baseline. Where does the SOS Appendix B live?

looks like they got taken care of.

There were a few things from GC/CK that I wasn't sure had been addressed.

Also, I forgot that this short version didn't have the species distribution/timing tables. Rosalie had comments that the references needed to be updated as they were data references (should be current).

So at some point the appendix SOS and the envB section of SOS will need to be checked/updated.

Looks good to me, you are welcome to let HB know you got it ready, thanks!

Okay, sounds good. I didn't know there were outstanding comments so I can try to address those today (in the Master version).

Thanks Kristin!

I wanted to check first about a few things to see if they fell off the radar and still need to get done (they

may be things we can do while/after it goes out for this draft).

let me get back to you in a bit.

Good Morning Naseem,

I've created a new version of the SOS on the server "2-2-Status-of-Species-and-CH_Draft_Distribute to DOI" and have added the header, deleted Rosalie's comments, and added a "draft" watermark. I think this is all that needs to be done. Should we send it to Howard?

Naseem and Kristin,

Can you work together to get the SOS section ready to share by noon Friday. I think it just needs to be cleaned of comments and track changes, given a disclosure header (see the shasta or delta versions that we shared) and given a DRAFT water mark. Also, please name the version that we will share similar to other shareable versions (see Environmental Baseline of East Side version name convention). Thank you!

Howard
