**Subject:** Re: Stan/SJR section coordination for Tuesday COB

Okay, I've gone through and accepted most the track changes from previous comments/edits (per Naseem's suggestion) and renamed the doc "2.5 and 2.6 East Side Effects V13 MASTER". All the previous track changes/comments are saved in "V12" in the archive folder. Naseem had also made some comments that I mostly addressed. Some of DOI's comments say "let's discuss," but obviously there's not time for that so not sure how to address those.

I'd suggest saving your version as "V14 MASTER" so we can address any unresolved comments after today.

Good luck and let me know if I can help further with any comments. I'll be working on EFH section, which is low priority.

Kristin

**Garwin and Cathy** -- Please weigh in if my plan of attack doesn't sync up with what you expected to hear, and I will check back in if Kristin not available this weekend.

**Kristin** -- Per yesterday's meetings and post-meeting debrief, it was decided that responses to the DOI comments for all effects sections are due Tuesday COB, when the updated drafts will be passed along to the I&S leads. Some targeted elements will be shared with Reclamation Tuesday COB and a full "peer review package" will be shared with Reclamation on Friday (after another internal review).

***Are available at all before Tuesday to help? Please let me know either way\****

#### Plan of attack if you are available

**Barb**

- On Tuesday by COB:
  - Drop in COS temp tables and add any needed text (do not plan to summarize overall suitability narratively as we did for the PA; will note in text that temp tables are provided for COS for comparative purposes, but that narrative summaries not provided as key for aggregate analysis is what effects are expected under the PA). *Garwin, I started to pull together tables and modeling results to send to Kristin and think that I can add the red-shading as fast as I can explain it.*

- Add some language re: Vernalis assumptions
- Adjust the section with the COS-NMI, PA-NMI, PA-60-20-20 comparisons (just provide yeartype distributions for COS and PA and include key conclusions; move full analysis into memo to the record for the East Side Division)
- Review any edits from Kristin received Tuesday morning.

### Kristin

- By Tuesday morning: Provide edits (both for DOI and any outstanding edits from internal reviews) to Barb. For DOI comments, focus on those that relate to clarifications of the PA (note that Barb will address the comments relating to the section on Vernalis requirement assumptions and the comments asking for temp tables for the COS scenario). Please consider all comments, but Maria was clear that we should preserve our own judgment on what is appropriate to include in OUR effects analysis.
- Please make all edits in track changes to the file: 2.5 and 2.6 East Side Effects V12\_MASTER (probably worth updating the version number afterwards). DOI comments are saved the effects section folder: R:\Draft BiOp\2\_ESA\2.5-2.6 Effects of the Action\East Side Division. Don't worry about transferring over all DOI comments (I'll assume that edits in the MASTER doc are responsive to those comments), but if there are any comments you aren't sure how to deal with (but you think are major enough that we should try to), give me a call or copy the comment over so I can take a stab on Tuesday.

### Kristin & Barb

- Tuesday afternoon: Check in to deal with any revision questions and make sure all our "parts" have been incorporated into the MASTER doc. Post final to ROCON by COB and let ROC managers know we're done.

Barb

\*Garwin and Cathy, if you're thinking that if Kristin isn't working, she won't know to let me know that, I have texted her as well. :-)
