Subject: NMFS Items for ROC LTO

Hi Katrina --

There are a few items that I want to be sure don't get lost going to to this week. Can you let me know the updates on these?

- DSM2 Analyses at Additional Locations. I sent a list of additional locations to you on Friday. Pleas let me know if there are any concerns with these and what to expect for the timeline.

- Methods Recon. There were several items on which ICF was going to do recon and report back (Salim, SALMOD, IFIM, Rec Mortality Model). What's the status of these? I suspect that hat NMFS will need to make decisions on these methods this week. Some of those methods may deserve a short call with ICF and our relevant tech staff.

- Delta SDM Survival. Mike Beakes had asked some questions, but then it seemed to clear up after you and he talked. I offered a call if there was still uncertainty at the task, but haven't heard back. Is that effort in a good place or do we need to follow up?

-Seth should have been in touch with TRRP staff to work out the Trinity needs. Ige you've heard different, please let me know.

I know it is a busy time. I'm in all week so feel free to call. Thanks!

Cathy
