Garwin --

For you to transmit to reviewers (Howard, Maria, Rosalie, (Naseem?) and perhaps Chris).

Attached is the draft Section 2.1 Analytical Approach for the ROC LTO for your review. ***I recommend that you "Save As" with your initials appended to the filename.***

Please note that there are a number of items that are not ripe for finalization and await updates that won't be ready until later. I have flagged these in yellow comments.

There are no track changes on this version, but I have retained comments for you to see your previous reviews. In many cases, I have marked these comments "done" and faded them, and in several I have also responded. Comments that are not faded still require some attention.

Comments in blue can generally be ignored by you; these are for tech editor and reference manager.

Thanks -
Cathy
