Subject: NMFS list of ROC on LTO uncertainties

Russ and Jana,

I thought our discussion today was good and clearly demonstrated the complexity of this issue. Cathy and I are meeting this afternoon to work on the appendix C and hoping that we will have some high level input that we can work from on Friday. Attached are two docs for you: One is the AM briefing paper that we circulated for the March 8 Director Meeting and the other is our snapshot of some of the areas of uncertainty that we are thinking about. You will see that there are operational uncertainties that we have tied to effects and scientific uncertainty. Hopefully this gives you an insight into some of our thinking and that we can talk through this on Friday.

Howard
