Maria -- Attached is an updated version of the Delta section with additions based on your feedback on Wednesday morning. It is still rough; I'll give you a call and we can walk through some of the key additions and prioritize any remaining to-do's.

Some remaining shortfalls include:

--summary of Chinook and steelhead 6-year study results

--inclusion throughout text of specific recent citations; still relying on reference to SST report to incorporate by reference that lit review.
