Subject: Re: Request for NMFS reference in BiOp

Hi Cindy --

That document is a memorandum to our administrative record, which, while in development throughout the consultation, has not yet been completed since the consultation isn't yet completed. The memo is still in internal review and not yet available. It will be available upon completion of the BiOp.

Thanks,
Cathy

Hi Barb and Cathy,

I received a request for a copy of the below reference. If possible, please send it my way.

Thank you,

Cindy

"copy of the memorandum mentioned at page 16 of the draft section on Upper Sacramento River Effects:

"NMFS has developed a memorandum to the ROC on LTO administrative record that evaluates various lines of evidence, including the CalSimII modeling of Shasta storage (from the ROC on LTO BA Appendix D), historical evaluation of Keswick flowrates, and CalSimII Modeling of Drivers of Shasta Releases."
