Subject: Re: update outline with this table?

I like stressors as rows as in Naseem's example. If everyone agrees, I can "transpose" the example in the TOC on the ROCON drive.

Attached is the full list of stressors (with final GS stressors TBD), shared with everyone via the ROConLTO agenda scratchpad for check-in meetings.

Naseem, do you want to share your finalized doc along with this "all stressors" matrix with all Division teams or shall I?

Hi Cathy and Barb,

My understanding is we want to get this out to the Effects writers ASAP?!
I had Jeff take a quick look and add any he could think of, and he offered several.
I incorporated and "finalized" the attached (though we can continue to add if/when people think of additional specific stressors to discuss).

So this is specifically for CV salmonids. GS coming soon - others lists are available, where?

There is a stressor table on the outline, but doesn't say "example" - and the example is the opposite of the stressor tables... (stressors list in first column, action components along the top row).
