Subject: Re: send baseline

Here is my update/response to comments. There had been enough "updates/additions" during the Klamath review it would have been hard to just fine tune each paragraph, so largely I just plunked in whole paragraphs. I know it may confuse any reviewers, but I assure folks the differences aren't as large as it appears. And other than specific references to CV, this was all just blessed by GC.

I did look at and update the "Status in the Action Area" section too. There is duplicity with the actual Status of the Species section, but at least the information in here is now updated as it was presented. Hopefully this all makes sense.

Dan

Hi Naseem

Unfortunately i'm firewalled out of the network right now and can't get to the shared drive - any chance you can just send me the version of the baseline I can edit? I will probably not have network again the rest of today based on past experience with things where I'm working today.
