Hi Naseem,

See if this hits the mark. Please let me know if you have any questions.

Susan

Hi Susan and Jeromy --

I'd like to follow-up with Naseem's request for you to give a red-face-test read-through of this document. It is an excerpt from the Environmental Baseline section of the draft BiOp for the CVP/SWP consultation -- the current big beast with an impossible deadline in the CV. Rosalie suggested we reach out to you to be sure that the numbers reflected recent info.

We are quickly closing in on our internal milestones to have sections completed for the expedited clearance process. Could you work a high-level review of this into the next week? And if you think that someone else should look at this instead, could you let me know ASAP? It's just over three pages, and you can focus on the highest level to be sure that we aren't way off-base if you are not able to give it a more detailed read.

Feel free to contact me or Naseem if you have any questions.

Thanks -

Cathy

Hi Susan,

Thanks for your response earlier.

If you all have some time within the next two weeks to look at the section I sent before, I'd really appreciate it!

Hi Nadeem

We are swamped with our annual PFMC meetings to plan for the seasons fisheries. We will need to get back to you on this after April 16. Let us know if there is anything narrowly focused that we can get you in the meantime if it is urgent.

Hi Susan and Jeromy,

Rosalie del Rosario suggested I contact you to ensure we have the "best available info" on salmon harvest.

We are working on a **large** consultation (California Central Valley-wide), and include a section on "Harvest" in the Environmental Baseline section.

The attached is what the section looks like so far, with some comments from Rosalie (and others).

Please let me know if you can offer some updates, or references, or if there is someone else more appropriate to check with.

Thank you for your help!
