Thanks. Don't have time to think EB now. Will look at the paragraph and comments tomorrow.

Brian --

For the EB revisions, please also consider this paragraph on CWF, which Naseem asked me to provide.

Let us know if we need to strategize the best way to address the reviews and where others could help. I know you have a lot on your plate.

Thanks,
Cathy

Brian,

See Naseem's comments, below, for some explanation. The EB folder has what looks like 3 sets of comments, from Naseem, me, and Page/Joe. I have no idea why mine reflects "v3," compared to "v1" for the other 2. Hopefully that's not a problem. I asked for comments by COB 3/28, so there may be other comments trickling in, plus Maria is on leave this week.

Hi all,

I have placed my review of the draft Environmental Baseline section on the drive (and is attached).

For those that haven't completed your review, consider adding yours to one of the ones already completed (to have less individual reviews). Mine got a little busy because I added some sections.

I have farmed out a few write-ups: Brittany (water quality - part of my review); Page (green sturgeon - there will be a separate review on the drive); Jon (will be sending an update on the Shasta reintro RPA next week); Amanda (will be providing discussion on the other hatcheries in the action area - Nimbus, LSNFH, Coleman); and I asked Garwin to update the other RPA actions (in his review).

As discussed with Barb, and Howard - I added a section on restoration programmatics (ongoing restoration actions), which we expect will help set up how we consider existing and ongoing monitoring/restoration listed in the BA/PA. I also added a section on mitigation banks.

All --

Brian has completed the ROC LTO Section 2.4 Environmental Baseline for Review. As acting for Garwin, I am sending it for your review.

Please send back any track changes by ***COB next Thursday, March 28.***

Maria, Rosalie, and Chris: When you send back any track changes, please indicate whether you're clearing the document with the revisions, or whether you need to see it again.

I recommend that you "Save As" with your initials appended to the filename. You may also access and "Save As" on the server here:

CVP ROCON\Draft BiOp\2_ESA\2.4 Environmental Baseline\Environmental Baseline v3 SRB.docx

There are no track changes on this version, but there are two placeholders. Comment boxes generally pertain to references and do not require your attention.

Thanks,
Cathy
