Hey Josh,

I was under the understanding that Salmod and the Reclamation mortality model would be helpful to understand fall-run production, but I am not quite sure. I think what we are really needing is to have someone to work directly with Dan Lawson, our killer whale person, to get him the information he needs. I understand from talking with you that John H could do that and Cathy tells me that Rick Wilder could also make that happen. Dan is starting to ask for information so that he can do his analysis, so let me know how you would like to manage. Feel free to call me if that is easier. 916-704-4847.

Howard,

Im in discussion with Katrina and John to figure out the fall Chinook production modeling. I am unclear what model you are interested in his help with.

Ian and Mike are in the field this week until Friday, next week at IEP, then the following week in the field again. I may be able to get them to a meeting together between 11-12:30. Please let me know if this works and send us a meeting invite.

Im in meetings today and tomorrow, but will monitor email.

Thanks, Josh

Hey Josh, Might you, Ian, Mike and John be available this week to come over to our office to discuss Biop support needs and roles? Lots going on this week but we could make Thursday afternoon after 2 work or Friday, anytime except 12:30-1:30. I think the most pressing need right now is for John to help us with getting fall-chinook production numbers to our killer whale expert.

Thanks!

Howard
