Subject: ROC Comments

Russ and Dave,

In preparing for next week, we have been looking over some of your comments and have some thoughts about how to go through them that I want to share with you. We have three main bins of comments that pretty much track with the categories Dave walked us through earlier in the week and we would propose working through them in this order:

1. Proposed Action Characterization: We would like to address any areas where we have, or you feel that we have, mis-characterized the PA.
2. Comparative Analyses and Actions Not Included in the PA: There are areas where we made comparisons and included actions in the discussion that Reclamation disagrees with or where you feel that we did not include comparisons that your expected to see.
3. Analytics and Uncertainty: We would like to work through areas where there is disagreement with the analysis and areas where we have identified uncertainty and applied assumptions.

Our hope is that Reclamation will prioritize comments for these categories and be ready to work through those priority areas next week. If there are other categories that you feel we missed, please let me know or bring them up on Monday and we can factor them into the mix.

Howard
