Subject: Re: ROCON model matrix - Invitation to edit
Attachments: ROCON model matrix (sum).pdf

Hi Howard,

Attached is the current state of listing the modeling/analyses that may be needed for ROCON. The list, in its present form, does not prioritize or limit the number models/analyses as to do so would require a more in depth technical discussion. If this isn't what you are looking for please let me know and I can try and change it accordingly (the google docs version is still available for those that want to make changes).

Evan
