Subject: CCVO-SWFSC Discuss SJR I:E Support for ROC

Cathy -- This is a good group to discuss ePTM options with, including the DWR option (since Russ and Adam are very familiar with Xiao's model. We could also ask whether is best to use a single ePTM option for all applications in the ROCon BiOp, or tailor to target species (e.g. use a north-Delta-y option for Sac basin fish; another option for south Delta/SJ fish?). Seems most straightforward to have a single ePTM, but could perhaps argue that a WR-oriented module is appropriate for use in the WRLCM and another is more appropriate for some stand-alone analyses specific to the south Delta and SJ/export ops.

Just a thought; you may already have a full agenda planned.

CCVO-SWFSC Discuss SJR I:E Support for ROC

Follow-up and continuation from Dec 21 meeting. Agenda to follow.

When Thu Feb 7, 2019 1pm – 2pm Pacific Time - Los Angeles

Where 1-877-929-9042 Passcode 765321 ([map](#))
