Subject: ROC Environmental Baseline

I dropped the ball on the EB section by not including figures for each species like the one below that we did for the 2009 BO. If there is somehow time to circle back on the EB section, we may want to pull more from the 2009 BO EB, by adding figures like this one and text related to Future Baseline.

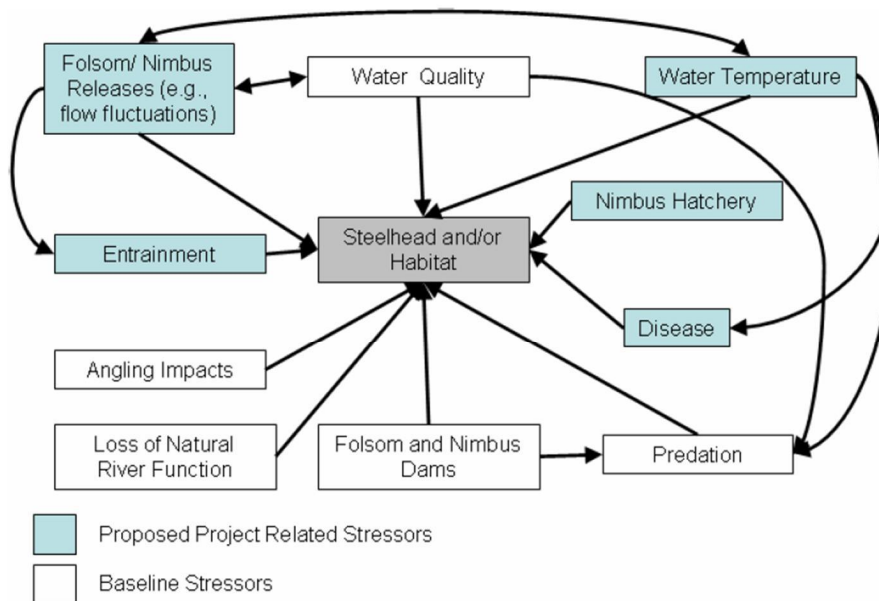

Figure 5-19. Conceptual model of the future baseline stressors and proposed project-related stressors affecting naturally-produced American River steelhead.
