Thank you Barb. Here is the section with added information on the change in exports and salvage.

I attached one copy with the changes tracked so you can see the additions (may be a couple I made at the beginning before I turned on track changes) and another with the changes accepted.

Salvage density results for John

On Tue, Apr 9, 2019 at 2:33 PM Hannon, John <jhannon@usbr.gov> wrote:

Hi Barb,

Do you have the salvage density model info you could send me?

I believe I've made all the other edits you and Dan suggested and just need to consider what is in that salvage info now. The DPM model is intended to incorporate salvage along with all the other sources of mortality in the delta but it will be good to take a look at that salvage info like you suggested.

Thanks
