This briefing paper has a good graph from Cyril 2016 that show flow related survival for FR. I believe this was recently published.

Jahnava and Howard,

Thanks for participating in a good call today. Attached is version 2.0 of the 1 page briefing doc, reflecting changes we talked about making today. Please go over this and make any changes you see fit.

Howard- I didn't include SWRCB consideration/adoption of CDFW Flow Criteria as a bullet. Wasn't real sure how to work it in? Please give that some thought.

Jason- please review and provide comments/edits.

Hope you all have a nice weekend. Matt
