Subject: climate change reference?

Hi Cathy,

I'm thinking this paragraph was in CWF? Any thoughts on the following statement - Rosalie asked for a citation:

Water management is just one of a few landscape-scale factors that have shaped the Central Valley environment - gold mining, dams, and levees also have played an important role. More recently, climate change has emerged as perhaps the most important factor affecting the Central Valley landscape environment. [\[NA1\]](#)
