**Attachments:** 2.5.9 LifeCycle Models--V2 -- MASTER noble.docx

Hi Cathy and Eric,

Some edits made in track changes and a couple general thoughts.

Love the alliteration Cathy - and your ability to keep a sense of humor with all that is going on! Let me know if you have any questions or need any clarifications once you get a chance to take a look. I'll be around this weekend with the requisite soccer games and birthday parties, but can likely respond if given a little lead time.

We are also working on finishing up the WRLCM description appendix and should have that sent off later this afternoon.

Cheers,  
Noble

All the work and travel, and she still has time to come up with alliterations. Wonder Woman basically.

Eric and Noble --

Attached is the latest section of the LCM writeup for the ROC BiOp. I'd like you to review this to be sure we are not mis-stating anything. You can make comments and track changes directly in the document.

As of right now, we are still sending sections to the peer review on Sunday evening. If you can turn this around for COB thursday, that would be incredible. But COB Friday is when we absolutely need it. Don't worry about the IOS section --just focus on the WRLCM results.

Note that I have a few comment bubbles where I question hwo we have stated a result and what it means. Please feel free to confirm or clarify or correct (ooh, I just made up that alliteration).

Thanks-  
Cathy
