No comments - - very nicely done! (btw - - can Stephen copy this text and put it on a drive others can see on how to assess temperature tolerances? perhaps put on WCR water quality intranet page)

All --

Find attached an excerpt from the currently updated Shasta effects section that contains revised text regarding our use of EPA 2003 vs. other temperature criteria. This was discussed on Wednesday and I thought would be a key item for Rec to see COB tomorrow. It echoes a lot of what Stephen provided during the meeting (since he wrote it ;)).
