**Subject:** Re: ROC Environmental Baseline section

That looks good to me. I'd like to move it to the section on the Importance of the Action Area Recovery (it's called something like that). You ok with that?

For s-r and steelhead, we can highlight that Clear Creek is Core 1 for both and almost all (Calaveras) of the Core 1's, even those not spawning in the action area, need the migratory and rearing areas of the Sac to be functioning well. Something like that.

Everett is off on spring-break this week, so I'm mostly off today, but do plan on sending the file in today to meet the deadline. I've worked on it a lot since I sent it to you. Text or call if you want to connect.

Thanks,  
Brian

Hi,

I wrote up a section for winter-run, but didn't do the same for spring-run or steelhead yet, those would be a little longer. Let me know what you think.

Here's the file. If you can, please put in text for the CV species on recovery like you mentioned. I added two comments with your name in them to signal where the new text could go.
