

2017 NMFS CWF BiOp Environmental Baseline Figure (Fig. 2-8).

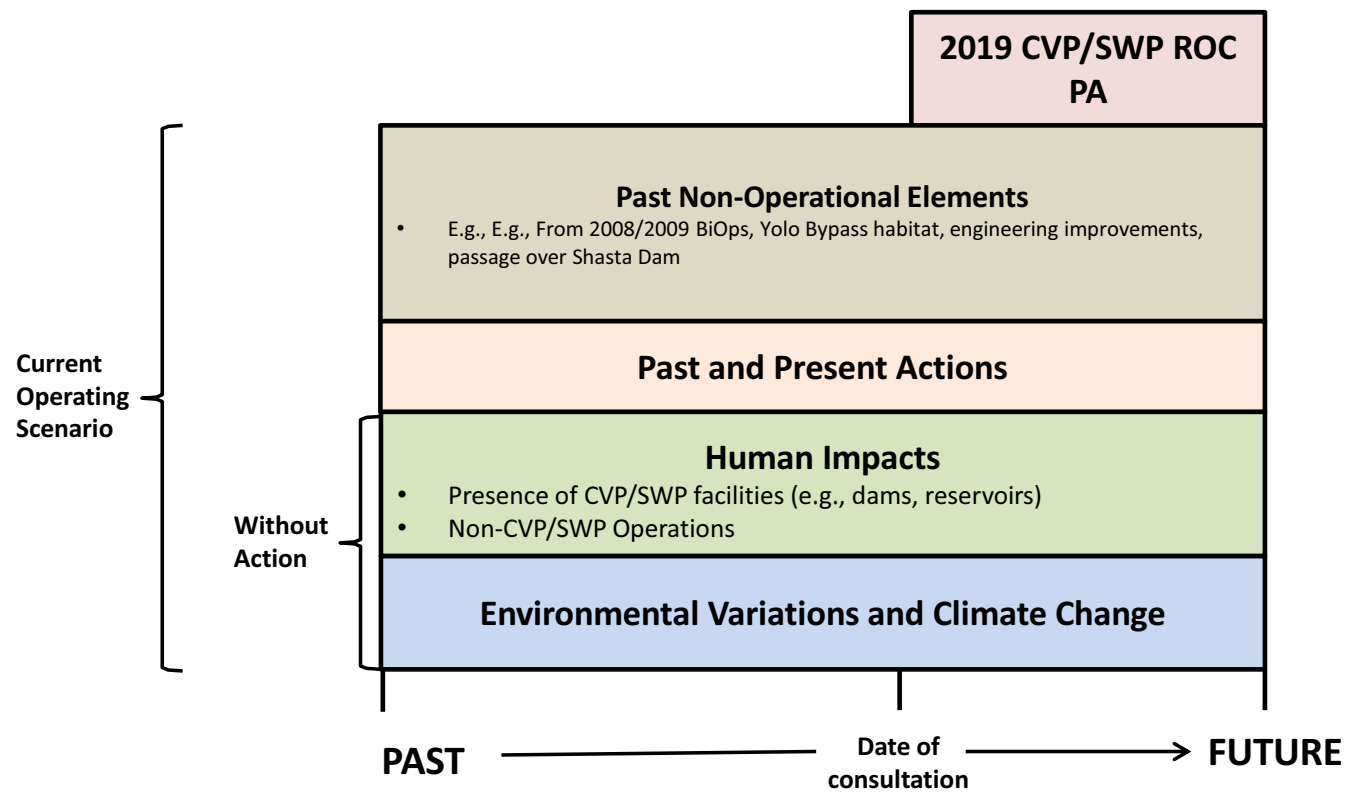

Figure blocks are illustrative of general categories of components of aggregation of effects in the analysis. Figure does not denote relative intensity of effect or whether impacts are positive or negative; temporal variability of effect/impact is not depicted.

* After PA operations commence, 2008/2009 BiOp CVP/SWP Operations will govern all upstream operations and any Delta operations not included in the PA Operations.

Revisions to Characterize “Without Action” Baseline as identified in 2019 ROC PA.

Figure blocks are illustrative of general categories of components of aggregation of effects in the analysis. Figure does not denote relative intensity of effect or whether impacts are positive or negative; temporal variability of effect/impact is not depicted.

Revisions to Characterize NMFS' Approach for Consultation on 2019 ROC PA.

Figure blocks are illustrative of general categories of components of aggregation of effects in the analysis. Figure does not denote relative intensity of effect or whether impacts are positive or negative; temporal variability of effect/impact is not depicted.
