Subject: Re: Green Sturgeon and the EnvBaseline

Great catch Naseem!

We should be able to work in some discussion on impacts to green sturgeon in the factors already covered up front (e.g., dams), and feel free to add any key factors that are missing. Thanks!

Hi Page and Joe,

I mentioned to Cathy that the front end sections of the draft ROConLTO environmental baseline is heavily salmonid focused.

We are hoping one/both of you could look through to see if "and green sturgeon" is appropriate for some of the sections, or otherwise include a statement and citation(s) about green sturgeon to the discussion.

Attached is the draft. If you do a "find" for "sturgeon" you'll see it doesn't show up until page 14. There may be a few sections after that as well that they should be added to.

Reviewers are being asked to be done by COB the 28th. I believe we are hoping you all can be get through it by then as well (Cathy?)

Let me know if you have any questions!

Thanks for your help!
