Subject: Green Sturgeon and the EnvBaseline

Hi Page and Joe,

I mentioned to Cathy that the front end sections of the draft ROConLTO environmental baseline is heavily salmonid focused.

We are hoping one/both of you could look through to see if "and green sturgeon" is appropriate for some of the sections, or otherwise include a statement and citation(s) about green sturgeon to the discussion.

Attached is the draft. If you do a "find" for "sturgeon" you'll see it doesn't show up until page 14. There may be a few sections after that as well that they should be added to.

Reviewers are being asked to be done by COB the 28th. I believe we are hoping you all can be get through it by then as well (Cathy?)

Let me know if you have any questions!

Thanks for your help!
