Page --

If there are any references that you cite to that are NOT in the CVO References.enl EndNote library, send those papers/sources to Norma. If you can write out the info that would go into a bibliography, too, this is helpful for her. Ask her to put them into CVO References and tell her that they are being used for the ROC.

Thanks!
Cathy

Hi Naseem,

My edits are in tracked changes and I've added the citations to new references in comments. Do I need to send these to Norma do put in EndNote?

Joe, will you review what I've added to make sure it's correct and addresses your concerns?

Thanks,
Page

Great catch Naseem!

We should be able to work in some discussion on impacts to green sturgeon in the factors already covered up front (e.g., dams), and feel free to add any key factors that are missing. Thanks!

Hi Page and Joe,

I mentioned to Cathy that the front end sections of the draft ROConLTO environmental baseline is heavily salmonid focused.

We are hoping one/both of you could look through to see if "and green sturgeon" is appropriate for some of the sections, or otherwise include a statement and citation(s) about green sturgeon to the discussion.

Attached is the draft. If you do a "find" for "sturgeon" you'll see it doesn't show up until page 14. There may be a few sections after that as well that they should be added to.

Reviewers are being asked to be done by COB the 28th. I believe we are hoping you all can be get through it by then as well (Cathy?)

Let me know if you have any questions!

Thanks for your help!
