Subject: Re: ROC American and Feather

Thanks Garwin. I would add:

- Why is the Nimbus Hatchery steelhead program, and associated RPA actions from 2009 BO not included in the proposed action?
- Are the fish agencies excluded from flow management process? If so, why? The BA discusses flow planning among water interests and Reclamation, but the fish agencies seem to be excluded from the process.

Per Reclamation's request (from Friday), it would be very helpful if we go in to these meetings with a list of questions. Do you see any gaps in Reclamation's proposed action that need to be filled? Explicitly where are those gaps?

Pertaining to the American River, questions that I can think of:

- Not a question, but a request for Reclamation to send to us the 2017 Water Forum Flow Management Standard (WF FMS)
- What explicitly is Reclamation proposing (within the 2017 WF FMS)? I heard everything except storage targets.
- Is Reclamation proposing anything within the 2009 RPA? If so, what are they?

ROC American and Feather

When Tue Feb 26, 2019 12pm – 1pm Pacific Time - Los Angeles
